10 File formats

Bane NOR requires open international file formats, and supports the development of these. Until these formats are available for all subjects in transport, other formats can be delivered by agreement with the individual projects.

Professional responsibility

The BIM manager in Bane NOR has overall responsibility for the field.

The BIM manager is responsible for reporting the status of his or her areas of responsibility within set deadlines and with good quality, in accordance with regulations that apply at all times in the associated division.
