**15 Upgrade to "as built" model** ..... 1

## 15 Upgrade to "as built" model

After feedback from the contractor, the designer shall upgrade the following models: result, display, coordination and source model to «as built» status.

- All updates are based on the contractor's own measurements and geometric quality control. If there is a need for supplementary measurements or correction of the contractor's delivery procedures, this is ordered through the client.
- Designers shall continuously upgrade all performance models to «as built» status in accordance with the contractor's progress and delivery of measurements.
